

Power & Precision

32bit Full Colour Graphic Display
Rotary Selector, Keypad & Function Keys

12 Binary Inputs
6 Galvanically Isolated Groups
Analogue / Digital Recorder

6 Voltage outputs (300V)
6 Current outputs (32A)
Simultaneously Available

Communications:
Ethernet IEC61850
USB
Storage:
USB

DRTS 66
Automated Relay Test Set

DRTS 66 is the new generation of advanced automated relay test sets from ISA. With market-leading features like 6 current and 6 voltage high-power outputs, high precision (better than 0.05%) and a fully integrated operator interface, the DRTS 66 is the new industry benchmark.

To find out more about the DRTS 66, visit www.hvautomation.com.au or call Paul Evans on 0434 382 511. See us on Stand 24 at TechCon® Asia-Pacific in Sydney on 18th and 19th May.

HV Automation is a trusted supplier of quality test, monitoring and measurement instruments for the power transformer and utility markets in Australia and New Zealand. We represent some of the world's leading manufacturer's of test equipment.
